ACTION LIST

- DMARC** Publish a _dmarc TXT record, starting with p=none and rua so you receive reports.
- DKIM** Your DKIM selector may differ. Enter your selector(s) manually, or set up DKIM signing at your mail provider.
- MX** Without MX this domain cannot receive mail (which may be intentional for a send-only domain).
- TLS-RPT** Add a _smtp._tls TXT record with v=TLSRPTv1 and rua= to see TLS problems.
- BIMI** BIMI first requires p=quarantine/reject. After that you can publish your logo.
- DNSSEC** Enable DNSSEC at your DNS provider for additional integrity.

DETAILS PER ITEM

DMARC BAD

No DMARC record found.

Advice: Publish a _dmarc TXT record, starting with p=none and rua so you receive reports.**SPF** OK

~all (soft fail) · 1/10 lookups · 1 include(s)

v=spf1 include:spf.it4sure.cloud ~all

DKIM WARN

No DKIM found across 27 attempted selectors.

Advice: Your DKIM selector may differ. Enter your selector(s) manually, or set up DKIM signing at your mail provider.**MTA-STS** INFO

No MTA-STS (optional — enforces TLS for incoming mail).

TLS-RPT INFO

No TLS-RPT (optional — reports about TLS failures).

Advice: Add a _smtp._tls TXT record with v=TLSRPTv1 and rua= to see TLS problems.

BIMI INFO

No BIMI (optional — shows your logo to recipients).

Advice: BIMI first requires p=quarantine/reject. After that you can publish your logo.

MX WARN

No MX found.

Advice: Without MX this domain cannot receive mail (which may be intentional for a send-only domain).

DNSSEC INFO

DNSSEC not detected (optional, but it strengthens your DNS).

Advice: Enable DNSSEC at your DNS provider for additional integrity.
